MaxiThermal™ On-Line Software

NO LIMITS — Any File. Any Location. Any Time. Any Users.

Secure Login

CLOUD-BASED DATA LOGGER ACCESS with 21CFR:11Compliant Database

MaxiThermal On-Line Enterprise SaaS is the ideal solution for managing and analyzing data from multiple data loggers with multi-user access from multiple locations, for all your clinical shipments. CLOUD-BASED ACCESS OR ON YOUR SERVER, it is easy to find and sort all your data files using our File Management Software.

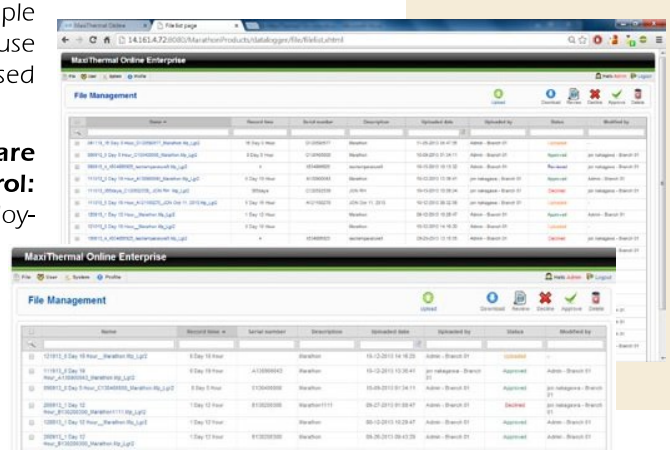
Features:

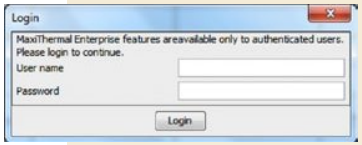
Location Independence: Data logger files sourced anywhere can be centrally stored, managed and monitored.

Flexible Hosting Options: From single Windows PC to multiple servers in multiple locations; local in-house servers to cloud-based services.

Web-based Software with Dashboard Control: Means hassle-free deployment for access by an unlimited number of users with a standard web browser. An intuitive and interactive dashboard makes it easy to view, manage, save and retrieve multiple data files with ease.

Dashboard Control



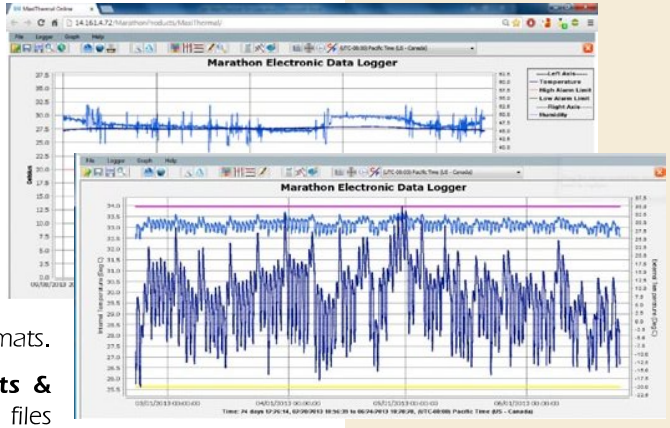


Concurrent & Secure Access: Enable multiple users to simultaneously perform analytics and administration functions while constraining actions based on permissions.

Audit Trail: Individual actions and exceptions are logged to the database for accountability and traceability.

Bulk Administration: Multiple logger data files can be managed effortlessly from a single web page.

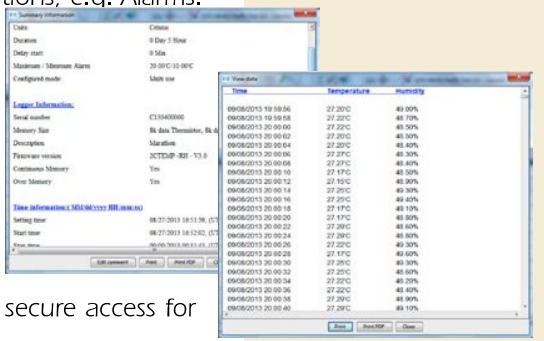
Historical Analytics: View aggregated logger data for any period in the past in graphical or tabular formats.



Export to Microsoft Excel for further analysis and reporting.

Multiple Sensor Inputs & Attribute Filters: Data files from different sensors are stored and managed in a central file database. Temperature, CO2, Humidity, Vibration Monitoring, (Electrical Power Consumption, N2, and O2 are Pending). A single click is all it takes to filter for specific status & conditions, e.g. Alarms.

Support for all popular browsers: Flexible, intuitive interface ensures that MaxiThermal-Online will work the same way regardless of your business browser standard.



Print Logger Preport & Data

Print Logger Reports & Data: Centralized storage with remote secure access for all loggers' data files.
